

How many crimes will be in  
the future Poland?

Author: Michał Szopiński

# Introduction/Business problem

Poland is a country located in Central Europe. It is divided into 16 administrative subdivisions. Poland is a member state of the Schengen Area, the United Nations, NATO, the OECD, the Three Seas Initiative, the Visegrád Group.

Many of people is travelling and discovering Poland. In this scenario I will answer a question **How many crimes will be in the future Poland?** and Is it save to travel there?

# Data definition

the whole dataset is based on open dataset from polish government since 1999 to 2019. In this scenario I will predict the future number of crimes. Group them by crime numbers. I will create folium map of Poland. To do that I use forsquare to find a right location of provinces.
